

KOKOWALL® Privacy Screen

Natural looking and ideally suited for plants!

The Kokowall® Industrial Privacy Screen's natural look befits any environment. The Kokowall® Industrial Privacy Screen is more robust and larger than the Kokowall® Garden Screen. The Kokowall® industrial privacy screen's outer side is finished with natural and durable coco fibres, which ensures a pleasing and ideal surface for climbing plants. The Kokowall® industrial privacy screen will be overgrown with plants within a few years.

Kokowall® industrial privacy screen panels consist of galvanized steel U-channels filled with a row of coco fibre wrapped plastic poles. Two coco fibre taped steel poles reinforce the coco fibre plastic poles.

The **Kokowall®** industrial privacy screen can be used as an environmental, "green" screen in public spaces or as a dividing exterior screen in office parking lots. Kokosystems can assemble the screens onsite and plant the climbing plants. The **Kokowall®** industrial privacy screen is a patented Dutch design and is manufactured in the Netherlands.

KOKOWALL® Privacy Screen

Natural looking and ideally suited for plants!

Recommended Use

Kokowall® industrial privacy screens can also serve as an alternative to low fencing or as decorative exterior wall covering. Panels can be placed between hardwood or galvanized steel poles.

Optional Features

Kokowall® industrial privacy screens with bevelled edges and panels with galvanized concrete mesh (inserted behind the coco poles) and pointed picket style screens. **Kokowall®** industrial privacy screens can be fitted (horizontally and vertically) with steel mesh panelling and are available in the same galvanized steel frame of the **Kokowall®** garden privacy screen.

Size Range

Standard heights **Kokowall®** industrial privacy screen: 180 cm/200 cm/220 cm/250 cm/300 cm.

Screens that measure 2.5 m in height or more will be stacked. **Kokowall®** Industrial Privacy Screens can be made to measure. The screens' width can be adjusted during the assembly process. A **Kokowall®** Industrial Privacy Screen weighs approximately 42 kg (W x H 250 x 200 cm). The screen's diameter is approximately 5 cm.

Poles

Kokosystems supplies H-profile IPE or HEA galvanized poles. The screens will be mounted to the hardwood poles with 9 x 9 cm stainless steel assembly clamps, and the screen's edges will be held secure by the pole's flange.

Eco Friendly Product

The poles are made of recycled non-PVC plastic. Coco husk is sourced from the coconut's outer layer. The quality of durable tropical coco fibres is similar to that of tropical hardwood. Coconut husk is a recyclable and sustainable product.

Plant Coverage

The **Kokowall®** industrial privacy screen will be covered in plants quickly as the screen is ideally suited for climbing plants' aerial roots.

Maintenance

Coco fibres will fade slightly due to sun exposure. The screens' natural looking exterior however will last. The climbing plants may require pruning over time.
